- ✓ Awarded 'Insta Award' in September for timely completion of multiple deliverables.

PROFESSIONAL EXPERIENCE

Project#1

Title	:	Enterprise Promotion Manager (EPM)
Client	:	PepsiCo
Description	:	EPM is dealing with contractual information by customer, funding element, Payment due dates, rates. Based on contractual dates system will identify when the payment should be made to customers. On a periodic basis the system prices out each funding element and it will charge the earned funding. EPM will generate a payment settlement based on the contractual data and it will only generate the payment settlement to the customer having contract.
Domain	:	Retail
Tool	:	PowerBuilder, SQL Developer
Databases	:	Oracle

Roles and Responsibilities:

- Frequent interaction with clients, understanding their requirement and appropriately providing the optimum solution for all the issues in the application.
- Writing SQL queries and root cause analyses of bugs.
- Providing support and maintenance to PowerBuilder applications.
- Developed the mappings that perform extraction, transformation and load of source data into derived master schema using various power center transformations like source qualifier, filter, Aggregator, Router, lookup, Joiner, Expression and Rank to meet business logic in the mappings.
- Analyzed mappings in the Informatica power center designer and involved in performance tuning of mappings.
- Understanding the Business rules completely and implemented data transformation methodologies.
- Minor/Major Informatica mapping enhancements depending on production impact.
- Actively involved in all phases of database development, from needs assessment to QA/QC, design and support.
- Monitoring the performance of database and checking execution time.
- Modifying or writing scripts in PL/SQL code such as procedure, function and package to implement business requirement or to remove any known errors.
- Providing alternative solution to client for key problems.
- Gathering the business requirements and converting them into SQL stored procedures for database specific projects.
- Involved in the continuous enhancements of application and fixing of production issues.
- Deploying various configuration patches in production based on client requirements on regular basis.
- Handled errors using Exception Handling extensively for the ease of debugging and displaying the error messages in the application.

Project#2

Title	:	SeeChange
Client	:	APL Logistics
Description	:	APL Logistics is freight forwarding and Transportation Company. As a Global supply chain specialist, APL Logistics offers a comprehensive range of origin and destination services in more than 60 countries, serving the automotive, consumer, industrials, and retail verticals, as well as providing transportation as a service.
Domain	:	Retail
Tool	:	TOAD, SQL Developer
Databases	:	Oracle

Roles and Responsibilities:

- Day to day interaction with DBA team for impact analyzing of the production code changes.
- Creating or maintaining PL/SQL Procedures, Packages and Functions.
- Writing database queries and root cause analysis of bugs.
- Deploying various data patches in production based on client requirements on regular basis.

EDUCATION

- ✓ B. Tech in Information Technology, West Bengal University of Technology (2011 - 2015): DGPA: 6.9
- ✓ Intermediate, Bihar School Examination Board (2010): 62%
